

UNIVERSITY OF COLOMBO, SRI LANKA

UNIVERSITY OF COLOMBO SCHOOL OF COMPUTING

DEGREE OF BACHELOR OF INFORMATION TECHNOLOGY (EXTERNAL)

Academic Year 2008/2009 – 2nd Year Examination – Semester 4

***IT4203: IT Project Management
PART 2 - Structured Question Paper***

**15th August, 2009
(ONE HOUR)**

<p>To be completed by the candidate</p> <p>BIT Examination Index No: _____</p>

Important Instructions:

- The duration of the paper is **1 (one) hour**.
- The medium of instruction and questions is English.
- This paper has **8 questions** and **9 pages**.
- **Answer all questions which carry different marks as indicated.**
- **Write your answers** in English using the space provided **in this question paper**.
- Do not tear off any part of this answer book.
- Under no circumstances may this book, used or unused, be removed from the Examination Hall by a candidate.
- Note that questions appear on both sides of the paper.
If a page is not printed, please inform the supervisor immediately.

Questions Answered

Indicate by a cross (×), (e.g. ×) the numbers of the questions answered.

To be completed by the candidate by marking a cross (×).	1	2	3	4	5	6	7	8
To be completed by the examiners:								

Census Modernization Project (CMP)

The case of a Census Modernization Project offers a classic example of an ambitious Information Technology project. When the Department of Census unveiled the project, the idea was to arm its field census enumerators with high-tech handheld devices that could directly capture and transmit the population information to the department as they collected the relevant information from the population. Census officials signed a 300 million contract with ABC Corporation to build 250,000 handheld devices, but they were not sure which features they wanted included in the units. What they did know was that this project would cost at least 2 billion in total. Though there were no detailed projections, they assured the public that the handheld devices were sure to save the department a considerable amount of time and money.

The ABC Corporation reported that since it signed on with the Department of Census, it received over 400 change requests to project requirements. Out of many who bid for the project, ABC Corporation's bid was the lowest, and the tender evaluation committee selected the lowest bid to award the project without taking into consideration their previous experience or the competency of the project team. ABC Corporation itself had had staff problems during and before the project with high staff turn-over. To top it all, the project manager himself was not available to work on the project due to a brief illness and had to be replaced by a new project manager who did not have the necessary experience to guide a project of this nature.

Last year after the initiation of the project, the handheld project was in shambles. In April, the Department head sent a press release announcing that it was significantly reducing the role of the handhelds in the next Census efforts. After spending hundreds of millions in taxpayer money, the census enumerators were for the most part going back to the old-fashioned pen or pencil and paper method.

Part of the reason the department scrapped the project was the subsequent cost overruns that were going to be necessary to get the full project off the ground given the midstream requirements changes. What is worse, even as census enumerators were relegated back to the paper age, the total cost of census estimates rose by the billions.

According to a report by the Government Audit, the units that were tested out in the field in the previous year were regularly experiencing problems with "transmission, the device freezing, map spotting (collecting mapping coordinates), and difficulties working with large blocks." Service levels were not acceptable and enumerators complained that it was taking too long to perform routine tasks. The project team had not accurately determined the load.

2) List five (5) project success factors that could have helped the CMP to succeed.

(10 marks)

ANSWER IN THIS BOX

3) a). What are the main objectives of integrated change control?

(6 marks)

ANSWER IN THIS BOX

b). Suggest 3 ways in which incomplete and changing requirements could have been reduced in the CMP.

(9 marks)

ANSWER IN THIS BOX

A large rectangular box with a solid border, containing 15 horizontal dashed lines for writing an answer.

4) a). List three(3) main processes involved in project time management?

(9 marks)

ANSWER IN THIS BOX

A large rectangular box with a solid border, containing 10 horizontal dashed lines for writing an answer.

- b). Some or all the processes in project time management may have been poorly managed in the CMP. Site one example each to show how three (3) such processes were poorly managed in the CMP.

(12 marks)

ANSWER IN THIS BOX

A large rectangular box with a solid black border, containing 20 horizontal dashed lines for writing the answer.

- 5) The management of human resources may not have been done professionally in this project. What tools or techniques could have been used by the project manager to manage the team members properly?

(12 marks)

ANSWER IN THIS BOX

- 6) a). Identify three (3) broad categories of risks for CMP.

(6 marks)

ANSWER IN THIS BOX

b). Develop a risk questionnaire for each of the categories of risks identified in question 6 (a.) Each questionnaire should have at least three (3) questions.

(9 marks)

ANSWER IN THIS BOX

A large rectangular box with a solid black border, containing 20 horizontal dashed lines for writing the answer.

7) What are the main processes in project procurement management?

(12 marks)

ANSWER IN THIS BOX

8) What criteria could have been used in source selection in the CPM?

(6 marks)

ANSWER IN THIS BOX
